The Metaphor Of God

This 'soft' divinity,
expressed in the 'son of
God' metaphor, eventually
developed into the 'hard'
metaphysical claim that
Jesus was God the Son,

Jesus' disciples could
mature enough to make such
bold claims as 'Jesus is God

In this groundbreaking work, John Hick refutes the traditional Christian understanding of Jesus of Nazareth. According to Hick, Jesus did not teach what was to become the orthodox understanding of him: that he was God incarnate who became human to die for the sins of the world. Further, the traditional dogma of Jesus' two natures--human and divine--cannot be explained satisfactorily, and worse, it has been used to justify great human evils. Thus, the divine incarnation, he explains, is best understood metaphorically. Nevertheless, he concludes

that Christians can still understand Jesus as Lord and the one who has made God real to us. This second edition includes new chapters on the Christologies of Anglican theologian John Macquarrie and Catholic theologian Roger Haight, SJ.

This is a second and revised edition of John Hick's much discussed book first published twelve years ago. He claims that Jesus himself did not teach what was to become the orthodox understanding of him; that the dogma that he had both a

divine and a human nature is incoherent and unintelligible; that divine incarnation is a metaphorical idea; that its literal construal makes Christianity the only religion to have been founded by a God in person, and thus uniquely superior to all others, a belief which has done so much harm in the world; that instead Christians should take Jesus as the one who has made God real to us and challenged us to live in God's presence. The new material now added shows how two major contemporary theologians, one Anglican and the other Catholic, face these

The doctrine of the Incarnation lies at the heart of Christianity. But the idea that 'God was in Christ' has become a much-debated topic in modern theology. Oliver Crisp addresses six key issues in the Incarnation defending a robust version of the doctrine, in keeping with classical Christology. He explores perichoresis, or interpenetration, with reference to both the Incarnation and Trinity.

Over two chapters Crisp deals with the human nature of Christ and then provides an argument against the view, common amongst some contemporary theologians, that Christ had a fallen human nature. He considers the notion of divine kenosis or self-emptying, and discusses non-Incarnational Christology, focusing on the work of John Hick. This view denies Christ is God Incarnate, regarding him as primarily a moral exemplar to be imitated. Crisp rejects this alternative account of the nature of Christology.

This book is a philosophical examination of the logical problems associated with the claim that Jesus of Nazareth was one and the same person as God the Son, the Second Person of the divine Trinity. How can a being or person who is omniscient, omnipotent, omnipresent, etc., have become human given that humans are limited in knowledge and beset with weaknesses? Unless this belief in the incarnation is to be dismissed as pious sentimentality, a philosophical case must be

made for at least the possible rationality of the idea. Tom Morris makes such an attempt in this book. Indeed, although it claims only to be arguing that the idea of God Incarnate is not impossible, *The Logic of God Incarnate* confronts the preponderance of modern philosophical argumentation against the incarnation and manages to put the traditional doctrine in a quite plausible light.

Grace is at the center of Christian experience and, indeed, sums it up in a single word. The doctrines of Christianity do not exist as a set of unrelated

This single reality provides the unifying principle through which all Christian doctrines are interconnected. *Grace in Experience and Theology* explores the many aspects of this unifying principle called grace.
