The Pacific Islands: Environment and Society | NHBS ...

Abstract. As countries of the Pacific island region enter the 1990s they face a range of environmental problems more extensive and more serious than ever before. Many of the potentially most damaging problems are caused predominantly by the activities of countries outside the region. Problems of ozone depletion, climate change, hazardous waste dumping, and driftnet fishing fall into this category.

The Pacific islands : environment & society (Book, 1999 ...

In addition, the islands' physical environments are isolated and varied. The large continental islands of Melanesia have widely varied landscapes, climates, and soil types; moreover, their rugged terrain has facilitated social isolation. The smaller volcanic high islands have greater homogeneity and easily support life well above the subsistence level.
