❑ I love the The Stanley Kubrick Archives book. Kubrick has always been a huge influence on me and my work, particularly 2001 (we used screenshots from the final scene of that film as reflections in early renderings of my pieces). The book is really well-designed and thought out, organized like a reference book, which is how I suppose Kubrick himself probably would have done it.❑

This intimate portrait by his former personal assistant and confidante reveals the man behind the legendary filmmakerfor the first time. Stanley Kubrick, the director of a string of timeless movies from Lolita and Dr. Strangelove to A Clockwork Orange, 2001: A Space Odyssey, Full Metal Jacket, and others, has always been depicted by the media as the Howard Hughes of filmmakers, a weird artist obsessed with his work and privacy to the point of madness. But who was he really? Emilio D'Alessandro lets us see. A former Formula Ford driver who was a minicab chauffeur in London during the Swinging Sixties, he took a job driving a giant phallus through the city that became his introduction to the director. Honest, reliable, and ready to take on any task, Emilio found his way into Kubrick's neurotic, obsessive heart. He became his personal assistant, his right-hand man and confidant, working for him from A Clockwork Orange until Kubrick's death in 1999. Emilio was the silent guy in the room when the script for The Shining was discussed. He still has the coat Jack Nicholson used in the movie. He was an extra on the set of Eyes Wide Shut, Kubrick's last movie. He knew all the actors and producers Kubrick worked with; he observed firsthand Kubrick's working methods down to the smallest detail. Making no claim of expertise in cinematography but with plenty of anecdotes, he offers a completely fresh perspective on the artist and a warm, affecting portrait of a generous, kind, caring man who was a perfectionist in work and life.

Part visual majesty, part meticulous science, part limitless imagination. Previously available as part of the multi-volume and instant sell-out Collector's Edition, this exhaustive compendium of photographs, pre-production paintings, and conceptual designs explores the genius behind 2001: A Space Odyssey, the sci-fi classic that remains the...

The definitive behind-the-scenes history of one of Hollywood's most closely guarded cinematic secrets finally revealed!painted backdrops and the scenic artists who brought them to the big screen. In almost every feature film of Hollywood's golden age, from The Wizard of Oz to North by Northwest to Cleopatra to The Sound of Music, painted backings have convinced moviegoers that what they are seeing/whether the fantastic roads of Oz, the presidents of Mount Rushmore, or ancient Egyptian kingdoms!is absolutely real. These backings are at once intended to transport the audience and yet remain unseen for what they really are. The Art of the Hollywood Backdrop reveals the hidden world and creators of these masterpieces, long-guarded as a special effects secret by the major studios such as MGM, Warner Brothers, Universal, Columbia, 20th Century Fox, and Paramount. Despite the continued use of hand-painted backings in today's films, including the big-budget Interstellar and Lemony Snicket's A Series of Unfortunate Events among many others, digital technology is beginning to supplant the art form. In an effort to preserve the irreplaceable knowledge of scenic masters, Karen Maness and Richard Isackes, in collaboration with the Art Directors Guild, have compiled a definitive history of the craft, complete with interviews of the surviving artists. This is a rich undiscovered history/a history replete with competing art departments, dynastic scenic families, and origins stretching back to the films of Méliès, Edison, Sennett, Chaplin, and Fairbanks. Filled cover to cover with over 300 images,The Art of the Hollywood Backdrop is beautifully packaged as a hardcover book with slipcase.

This a highly illustrated guide to the work of film director, Stanley Kubrick.

From his first feature film, Fear and Desire (1953), to his final, posthumously released Eyes Wide Shut (1999), Stanley Kubrick excelled at probing the dark corners of human consciousness. In doing so, he adapted such popular novels as The Killing, Lolita, A Clockwork Orange, and The Shining and selected a wide variety of genres for his films -- black comedy (Dr. Strangelove), science fiction (2001: A Space Odyssey), and war (Paths of Glory and Full Metal Jacket). Because he was peerless in unveiling the intimate mysteries of human nature, no new film by Kubrick ever failed to spark debate or to be deeply pondered. Kubrick (1928-1999) has remained as elusive as the subjects of his films. Unlike many other filmmakers he was not inclined to grant interviews, instead preferring to let his movies speak for themselves. By allowing both critics and moviegoers to see the inner workings of this reclusive filmmaker, this first comprehensive collection of his relatively few interviews is invaluable. Ranging from 1959 to 1987 and including Kubrick's conversations with Gene Siskel, Jeremy Bernstein, Gene D. Phillips, and others, this book reveals Kubrick's diverse interests -- nuclear energy and its consequences, space exploration, science fiction, literature, religion, psychoanalysis, the effects of violence, and even chess -- and discloses how each affects his films. He enthusiastically speaks of how advances in camera and sound technology made his films more effective. Kubrick details his hands-on approach to filmmaking as he discusses why he supervises nearly every aspect of production. "All the hand-held camerawork is mine," he says in a 1972 interview about A Clockwork Orange. "In addition to the fun of doing the shooting myself, I find it virtually impossible to explain what I want in a hand-held shot to even the most talented and sensitive camera operator." Neither guarded nor evasive, the Kubrick who emerges from these interviews is candid, opinionated, confident, and articulate. His incredible memory and his gift for organization come to light as he quotes verbatim sections of reviews, books, and articles. Despite his reputation as a recluse, the Kubrick of these interviews is approachable, witty, full of anecdotes, and eager to share a fascinating story. Gene D. Phillips, S.J., is a professor of English at Loyola University in Chicago, where he teaches fiction and the history of film. He is the author of many notable books on film and is a founding member of the editorial board of both Literature/Film Quarterly and The Tennessee Williams Journal. He was acquainted with Stanley Kubrick for twenty-five years.
