## **Understanding Chinese ...**

Evolution of the world wide web. The web has changed a lot since it was first created. The first websites were made up of simple pages of just words and pictures, a bit like online books or magazines.

## **What is the world wide web? - BBC Bitesize**

The early web community produced some revolutionary ideas that are now spreading far beyond the technology sector: Decentralisation: No permission is needed from a central authority to post anything on the web, there is no central controlling node, and so no single point of failure ... and no “kill switch”!

A web browser (commonly referred to as a browser) is a software user agent for accessing information on the World Wide Web. To connect to a website's server and display its pages, a user needs to have a web browser program. This is the program that the user runs to download, format and display a web page on the user's computer.
