As an organized movement, trade unionism (also called organized labour) originated in the 19th century in Great Britain, continental Europe, and the United States. In many countries trade unionism is synonymous with the term labour movement. Smaller associations of workers started appearing in Britain in the 18th century, but they remained sporadic and short-lived through most of the 19th century, in part because of the hostility they encountered from employers and government groups that ...

Although trade union membership continued to grow during the next two decades, up to around 1850 they tended to be overshadowed by political movements such as Chartism. But in the improved economic conditions of the 1850s and 1860s the foundations of a powerful trade union movement were established and membership rose from approximately 100,000 in the early 1850s to around a million by 1874.

Trade unions in the United Kingdom were first decriminalised under the recommendation of a Royal Commission in 1867, which agreed that the establishment of the organisations was to the advantage of both employers and employees. Legalised in 1871, the Trade Union Movement sought to reform socio-economic conditions for working men in British industries, and the trade unions' search for this led to the creation of a Labour Representation Committee which effectively formed the basis for today's Labo

An important development of the trade union movement in Wales was the Merthyr Rising in May 1831 where coal and steel workers employed by the powerful Crawshay family took to the streets of Merthyr Tydfil, calling for reform, protesting against the lowering of their wages and general unemployment. Gradually the protest spread to nearby industrial towns and villages and by the end of May the whole area was in rebellion, and for the first time in the world the red flag of revolution was flown ...

The origins of the trade union movement can be traced to the time of the industrial revolution, which transformed Britain in the 18th and 19th century from an agrarian and rural society to one which was based on industrial production in factories, textile mills and mines. The conditions in these new industries were often harsh, with men, women and even children forced to work long hours for very low wages.

Trade unionism is a world-wide movement. The evolution and growth of trade unionism has been sine qua non with growth in industrialisation. Accordingly, the evolution of trade unionism in India is traced back towards the latter half of the nineteenth century.

Organizing Matters demonstrates the interplay between two distinct logics of labour ' s collective action: on the one hand, workers coming together, usually at their place of work, entrusting the union to represent their interests and, on the other hand, social bargaining in which the trade union constructs labour ' s interests from the top down. The book investigates the tensions and potential complementarities between the two logics through the combination of a strong theoretical framework and an extensive qualitative case study of trade union organizing and recruitment in four countries – Austria, Germany, Israel and the Netherlands. These countries still utilize social-wide bargaining but find it necessary to draw and develop strategies transposed from Anglo-American countries in response to continuously declining membership.

This book offers the detailed historical background required for a holistic appreciation of current problems faced and the possibilities for revitalisation. In two volumes it provides introductory overviews of trade union development since the end of World War II in 26 countries from every corner of the globe. Each chapter explains the main contours of trade union growth and development in one country from the pivotal year 1945 to the present. Each chapter assesses the often dynamic expansion of trade unionism in the 1950s and 1960s; the role of trade unionism in the movements for national liberation in the Global South and the erection of social welfare systems in the developed North; the economic shocks that resulted in membership decline and loss of political influence from the late 1970s onward; the economic restructuring and growing labour market diversity of the 1980s and 1990s that undercut the traditional bases of trade union membership; and the historical roots of the contemporary political and economic context in which revitalisation efforts are taking place.

Based on extensive original research, this book examines the challenges confronting trade unions in the global South, by focusing on trade union struggles in Sri Lanka under neo-liberal globalisation. It centres on movement politics of unions; explains union capacities to mobilise workers as a part of broad counter movement; and specifies worker struggles in Sri Lanka. The author identifies key dimensions of variation in the approaches taken by oppositional groupings, in particular unions, other labour organisations and the labour movement, and locates those variations in a larger theoretical context. Three case studies on trade unions in tea plantations, garment factories and among the nurses show how these theoretical dimensions

operate in practice, and the consequences for the sort of opposition that is (and is not) created. The book contributes to the on-going debate on social movement unionism, and it also reveals their gaps in terms of addressing how class injustices are mediated through ethno-nationalist projects reproducing ethnic and gender hierarchies. It acknowledges the diversity of experiences and forms of resistance in the global South and critically engages with issues of gender, ethnicity and labour internationalism, providing a useful contribution to studies on South Asian Politics as well as Labour and Development Studies.

Meticulously researched, *Trade Unions and the State* not only sheds new light on one of Thatcher's most significant achievements but also tells us a great deal about the role of the state in industrial relations.
