Divergence trading is an awesome tool to have in your toolbox because divergences signal to you that something fishy is going on and that you should pay closer attention. Using divergence trading can be useful in spotting a weakening trend or reversal in momentum.

Sometimes you can even use it as a signal for a trend to continue!

Divergence Forex: What is Divergence Trading and How Does ...

A number of different forex divergence indicators may be used in forex divergence trading. The most common ones of them are the following: Moving Average Convergence Divergence (MACD) is a forex divergence indicator based on the evaluation of a technical indicator's exponential moving average values for 26 and 12 days or 9 days. In divergence forex trading, the MACD histogram in a way to reveal those moments at which price

does an upward or downward swing, but MACD does not do so.

Method Trading Strategies

Trading Divergence and

convergence in Forex

Forex Divergence trading is both

a concept and a trading strategy

that is found in almost all

markets. It is an age old concept

that was developed by Charles

Dow and mentioned in his Dow

Tenets. Dow noticed that when

the Dow Jones Industrials made

new highs, the Dow

Transportation Index tends to

make new highs as well and when

the Industrials index made new

lows, the transportation index

would also follow suit.

Strategies - FX Leaders

Alas, we do not have reliable volume statistics in spot Forex. In classic divergence trading, the core idea is that momentum leads price. When momentum reverses direction, we expect prices to follow. If prices are rising but momentum starts falling, we have a bearish divergence. A bullish divergence occurs when prices are falling but momentum starts rising. The bigger the divergence, the more likely price is to follow momentum.

Method Trading Strategies Trade Divergences

Forex Trading Strategy -
Stochastic and RSI Divergences

A regular bullish divergence occurs when the price makes lower lows on a chart, while the indicator is showing higher lows. This divergence pattern indicates that the price is expected to counteract its downward move and to change to a swift upward movement. Some forex traders prefer to call this type of divergence a positive divergence.
