Bill Hudson Transport Books | 117 Trams and Buses

Stand on a bus, and you risk getting thrown all over the place as every time it brakes sharply. But trams tend to brake and accelerate more gently, so you ' re relatively comfortable, even if you ' re standing the whole way. Oh, and you can extend trams by adding extra cars during rush hour, without clogging the road or hiring more drivers.

So are trams really better than buses? | CityMetric

Trams and Buses Includes industrial as well as passenger tramways, and any light railway calling itself a tramway, such as Wisbech and Upwell. See also the Narrow Gauge and Industrial section.

Gosport's Buses and Trams In 1878 a horse-drawn tram service was proposed to serve parts of Gosport and Alverstoke.

Gosport's Buses and Trams

A trolleybus (also known as trolley bus, trolley coach, trackless trolley, trackless tram [in early years] or trolley) is an electric bus that draws power from dual overhead wires (generally suspended from roadside posts) using spring-loaded trolley poles. Two wires, and two trolley poles, are required to complete the electrical circuit.

Trolleybus - Wikipedia

Bus & Tram Discount photocard - Transport for London

In the initial lockdown, these restrictions had a knock on impact to public transport services such as buses, trains and trams with firms reducing their frequency.

What will happen to Nottingham's buses, trams and trains ...

A fascinating look at London Transport and its various fleets of buses, trams and trains and very much aimed at enthusiasts. It was rather like a replay of my own childhood from the period of the 2nd WW through to the end of the 1950s.. The big difference being that I was a North Londoner and my favourite routes, garages and stations were north ...

This text, originally published in 1967, tells of the men and the machines which paved the way for modern road transport. It tells the story of road transport from the days of the stage and the long-distance mailcoach to the crowded age of the monorail, the express-way and buses that go by themselves.

In this, the fourth edition of the Transport Philately series the author looks at the treatment of transport using roads rather than rail or air. There have been some particularly attractive and colorful issues of stamps over the years ranging from a trio of beautifully presented illustrations of Israel ' s early buses to the well-known issue of double-deck buses produced by the Royal Mail in 2001, and who incidentally have seen the commercial opportunity by accompanying many issues with other paraphernalia, including a gentleman ' s tie featuring many of the bus illustrations. A well-known colleague in the Public Transport world still wears his Buses certainly are not as popular in the world of stamps as possibly aviation or wild-life, and trolleybuses even less so but the author has succeeded in finding a few, some of which are illustrated. Tramways, on the other hand, are a blessing to any collector with selections many and varied, some featuring trams from the beginning of the 20th century for their heritage interest to others providing an outlet of national or local prids at the inauguration of today ' s systems in developed and developing countries across the world. Never a year goes by without a new issue appearing somewhere in the world and the author likes to keep an eye on several sources of information including regular publications from the renowned Stanley Gibbons organisation, the fount of all knowledge concerning philately, as well as other equally valuable contemporary publishers. Then there are regular stamp fairs held throughout the UK and the world where dealers compete for your business, and at some of the bigger occasions – the postal authorities themselves. On your computer are the various internet sites and auction platforms where there can often be some real surprises and bargains to be found.

The Legal Background To The Operation Of Trams Trolley Buses & Buses Before Deregulation - A Guide For Historians & Enthusiasts.

"Which city once had the smallest trolley-bus in the world? Where do you find the first funicular railway in Southeast Asia? How do you recognize a trolley-bus pole? Where is Tramway Road?" "With over 100 old photographs, maps and illustrations, this book gives an overview of the various forms of public transport used in George Town from 1880s to 1963, and the role this transport played in the development of the growth of George Town and Penang." "Penang was one of the first urban centres in Southeast Asia to operate steam trams, horse trams, electric trams and trolleybuses. When the Municipal Commission established its own electric supply, it took over the tram service and started the electric trams in George Town in 1906. This gave the local population excellent public transport around George Town, with one line going up to Ayer Itam. In the late 1920s, the Municipality replaced trams with trolley-buses, experimenting for a while with re-conditioned double-deckers from London Transport!" "The Municipality also operated two railways - firstly, the Penang Hill Railway which was considered an engineering marvel when it was first built, and secondly, the electric railway which transported supplies and tin ingots for Penang's foremost smelting works."~BOOK JACKET.

"Trams, Buses, and Rails" recounts the unique and little-known 130-year history of Bangkok's transportation system, from the first horse-powered tramway in 1888 to the mass transit urban railway of the twenty-first century. Using government archives and annual reports, the author deftly pieces together long-buried records and statistics to reconstruct the transportation policies of each successive metropolitan and national administration. He highlights the politicization and regulation of Bangkok's transport systems over the decades, and uncovers a series of setbacks, reversals, duplications, revisions, and cancellations that help to explain Bangkok's continuing transportation woes. A series of maps and tables elucidate the development of transportation routes and the rise and fall of the city's trams, railways, and bus lines.

In 1904, when Leicester Corporation opened its state-of-the-art electric tram network, it enjoyed a monopoly on routes and convenient central terminal points. But soon the first small independent motor bus companies became active, and by 1921, Midland Red - shortly to be the largest operator in England outside London - was busily establishing itself. The city fathers were faced with a quandary; protecting their territory and services, and possibly extending them, albeit in the face of determined competition, whilst at the same time endeavouring to provide termini that were as invitingly close to the city centre as possible. In this they were assisted by the 1930 Transport Act, which provided the template for fifty years of fairly peaceful co-existence between Leicester City Transport and Midland Red. That is until the provisions of a new Act in 1980 set them at loggerheads again. Leicester's Trams and Buses - 20th Century Landmarks examines in detail the background behind five key events - the opening of the electric tram network in 1904 and its closure in 1949; the arrival of Midland Red in Leicester in 1921, via the protracted planning for Leicester's first proper bus station, to the so-called bus wars in the deregulation and privatisation era of the 1980s. It concludes that it was the pursuit of policies, at local and national government levels, which ultimately led to opportunities being missed that could have provided Leicester city and county with a fully integrated modern-day network.

This fascinating selection of photographs gives an insight into the history of tram and bus operations in the Leeds area.
