Typescript For Javascript Programmers

TypeScript stands in an unusual relationship to JavaScript. TypeScript offers all of JavaScript's features, and an additional layer on top of these: TypeScript's type system. For example, JavaScript provides

# Access Free Typescript For Javascript Programmers

language primitives like string, number, and object, but it doesn't check that you've consistently assigned these. TypeScript does.

TypeScript creator: How the programming language beat ...

TypeScript lets you write JavaScript the way you really want to. TypeScript is a typed superset of JavaScript that compiles to plain JavaScript.

TypeScript is pure object oriented with

# Access Free Typescript For Javascript Programmers

classes, interfaces and statically typed like C# or Java. The popular JavaScript framework Angular 2.0 is written in TypeScript. Mastering TypeScript can help programmers to write object-oriented programs and have them compiled to JavaScript, both on server side and client side.
