One of the most satisfying sewing projects is a tailored jacket or coat. Tailoring takes you through the process step-by-step. It guides you in selecting the tailoring method most appropriate for your fabric and pattern choice, as well as for your skill level and available sewing time. Most tailoring procedures are not difficult. Many are used in everyday dressmaking, so progressing to a tailored garment is a natural step. Although 'tailored' usually implies a garment with notched collar and lapels and a lining, many of the techniques used to create such a garment are also used in constructing other jacket and coat styles, including unlined ones. Custom tailoring was once the only technique for creating a professionally tailored garment, but now the machine and fusible methods are natural choices when faster, easier construction is desired. All three methods are included in Tailoring with suggestions for where and how to use them alone or in combination. And, regardless which tailoring method you choose, the result will be a beautifully tailored jacket or coat.

Since its first publication, *Classic Tailoring Techniques for Menswear* has been the authoritative resource for custom hand tailoring production. This new edition focuses on updating these timeless construction techniques through extensive use of all new photography and digital illustrations to enhance the

clarity of each process. The enduring art of tailoring and the nature of bespoke tailoring processes means that the techniques presented in the first edition remain as relevant for today's designers as ever. The new edition is updated with information on measuring, alternative approaches in use today and 748 all new photographs and illustrations. It also includes a brief overview of contemporary tailoring and the identifying key components of luxury tailoring from Britain, Italy and the United States. This introduction also familiarizes the reader with ways in which traditional production methods have been used in the development of luxury ready-to-wear men's tailoring. The text is ideal for students with basic design, patternmaking and sewing skills of at least an intermediate level for courses including Tailoring Techniques, Menswear Design, Couture Sewing, Intermediate or Advanced Construction Techniques, Costume Construction and Fashion Design Studios.
