VAs are staff who do work for you, but who are not in the same location as you. They can take on a huge range of tasks, from accounting to office management, thus allowing business owners and leaders to concentrate on the work that they're best at and that matters most. By hiring VAs, they can enjoy what is known as virtual freedom.

Entrepreneurs often suffer from "superhero syndrome"—the misconception that to be successful, they must do everything themselves. Not only are they the boss, but also the salesperson, HR manager, copywriter, operations manager, online marketing guru, and so much more. It's no wonder why so many people give up the dream of starting a business—it's just too much for one person to handle. But outsourcing expert and "Virtual CEO," Chris Ducker knows how you can get the help you need with resources you can afford. Small business owners, consultants, and online entrepreneurs don't have to go it alone when they discover the power of building teams of virtual employees to help run, support, and grow their businesses. The must-read summary of Chris Ducker's book: "Virtual Freedom: How to Work with Virtual Staff to Buy More Time, Become More Productive and Build Your Dream Business". This complete summary of the ideas from Chris Ducker's book "Virtual Freedom" details how many new entrepreneurs believe they have to do everything themselves. This method is impossible for a long period of time. According to Ducker, entrepreneurs should hire virtual staff to manage tasks. This gives them the freedom to focus on bigger tasks and work on their business. Building a virtual team requires three steps; find and hire workers you trust, train those workers and then constantly manage your team. By following these steps, you will be able to create a successful company without doing everything yourself. Added-value of this summary: • Save time • Hire virtual workers you can trust to do smaller tasks • Focus on the bigger picture and tasks that add more value To learn more, read "Virtual Freedom" and find out how you can start devoting your time to improving your business!

Communications giants like Google, Comcast, and AT&T enjoy increasingly unchecked control over speech. As providers of broadband access and Internet search engines, they can control online expression. Their online content restrictions—from obstructing e-mail to censoring cablecasts—are considered legal because of recent changes in free speech law. In this book, Dawn Nunziato criticizes recent changes in free speech law in which only the government need refrain from censoring speech, while companies are permitted to self-regulate. By enabling Internet providers to exercise control over content, the Supreme Court and the FCC have failed to protect the public's right to access a broad diversity of content. Nunziato argues that regulation is necessary to ensure the free flow of information and to render the First Amendment meaningful in the twenty-first century. This book offers an urgent call to action, recommending immediate steps to preserve our free speech rights online.

When you're starting your own business, it's easy to feel overwhelmed by a variety of pressing tasks or feel pressured to handle them all on your own. But the stress of completing mundane tasks can rob you of your sense of vitality and innovation, ultimately hurting your business and leading to burnout. So, if you've ever felt like you had too much to do and not enough time, you don't have to live with that pressure forever; outsourcing to a virtual assistant just might be the answer! Virtual Freedom (2014) is your one-stop guide to virtual outsourcing. By following Chris Ducker's manual, you'll learn everything from the secret to assembling your team to VA hiring etiquette to some top tips for avoiding the most common pitfalls of onboarding a Virtual Assistant. Written from Ducker's firsthand experience with hiring by trial and error, Virtual Freedom offers some unique and genuine insights into the power of virtual delegating.

The difference between helping and selling is just two letters. If you're wondering how to make your products seem more exciting online, you're asking the wrong question. You're not competing for attention only against other similar products. You're competing against your customers' friends and family and viral videos and cute puppies. To win attention these days you must ask a different question: "How can we help?" Jay Baer's Youtility offers a new approach that cuts through the clutter: marketing that is truly, inherently useful. If you sell something, you make a customer today, but if you genuinely help someone, you create a customer for life.

Are You Running Your Business or is Your Business Running You? Virtual Assistant Assistant is the book for entrepreneurs who are looking for a way to take their business to the next level. If you've ever caught yourself thinking there just aren't enough hours in the day, there is a solution. And it won't make you go broke, either. Virtual assistants are essentially telecommuting contractors to your business. This book tells you everything you need to know about virtual assistants, including: Where to find the best ones How to hire them Best practices for working with them on an ongoing basis It's written from firsthand experience, NOT theoretical or academic fluff. You'll learn how a talented virtual assistant can help save you time, money, and headache. Take control of your entrepreneurial life and learn how to effectively outsource your non-essential tasks. You'll free up hours every day to focus on what's really important. In the end, virtual assistants can help you lead a happier, healthier, and more productive and stress-free life. It's possible (and I would argue essential) to unload many aspects of your day-to-day work, leaving you free to tackle the higher-level, strategic, and money-making projects that often get neglected. Time is Our Most Valuable Resource But it's also the resource we are quickest to waste. With this book, you may not achieve the 4 Hour Work Week right away, but you'll get actionable advice on how to get started with outsourcing. The world's most successful people didn't get there alone; they all had help along the way. What are you waiting for? Hit the Buy Now button and get started today.

Why are you doing EVERYTHING yourself? What would you do if you had even one more hour a day devoted solely to growing your business and making more money? Virtual assistants will make your life easier by taking the stress out of your business life. As a small business owner, you need more time so you can make more money and stay competitive in an ever-changing world. If you're spending less than 70 percent of your time on work that doesn't generate revenue, isn't building relationships, or isn't creating new products, then you're not spending enough time on your business. It means you're spending too much time in your business. This book will show you why Virtual Assistance (VA) is the answer. Hire the Right Virtual Assistant is the complete guide to: Know what a VA is and how they differ from Executive Assistants Understand the benefits and need of a VA - it's more than just outsourcing Hiring the right VA the first time in less time than you think Finally be able to use the VA right away to make the biggest impact in your business and free up your time If you had time right now to work on your business instead of in it, what could you do? Could you make a sale? Visit a client and earn more business? Make another 20 calls a day to land more clients? Work the pipeline? Network? Think about your proven method to gain more clients. Using that method, how many more clients could you have if you had more time? This is where you put a VA to work for you. They work in your business so you can work on your business. I promise that hiring a VA will be the best decision you make for your business. You will get back your time. Scroll up and pick up your copy today!"

Thirty years ago, on Mother's Day, Mary Byrd Thornton's nine-year-old stepbrother was murdered. His killer was never found. At the time, Mary Byrd had been fifteen: in love and caught up in the excitement of the Sixties, but when Stevie died, her family and her life fell apart. For years she has struggled with the knowledge that the murderer is still out there, as well as her own nagging guilt over Stevie's death. Yet she has built a life for herself in Mississippi: she has married a Southern gentleman and has two children she adores. With her ramshackle house, her teeming garden and her menagerie of animals, she is immersed in a comfortable, if somewhat eccentric and occasionally restless day-to-day existence. When a journalist chances upon the mystery of Stevie's death and begins to dig into it, Mary Byrd suddenly finds herself on a reluctant journey back to her childhood home in Virginia. Along the way she encounters help from unexpected quarters and finds herself confronting not only her family's story but the stories of many others - both the living and the dead.

This book examines the risks to freedom of expression, particularly in relation to the internet, as a result of regulation introduced in response to terrorist threats. The work explores the challenges of maintaining security in the fight against traditional terrorism while protecting fundamental freedoms, particularly online freedom of expression. The topics discussed include the clash between freedom of speech and national security; the multijurisdictional nature of the internet and the implications for national sovereignty and transnational legal structures; how to determine legitimate and illegitimate association online; and the implications for privacy and data protection. The book presents a theoretical analysis combined with empirical research to demonstrate the difficulty of combatting internet use by terror organizations or individuals and the range of remedies that might be drawn from national and international law. The work will be essential reading for students, researchers and policy makers in the areas of Constitutional law; Criminal Law, European and International law, Information and Technology law and Security Studies.
