BEA's WebLogic Server implements the full range of J2EE technologies, and includes many additional features such as advanced management, clustering, and web services. Widely adopted, it forms the core of the WebLogic platform, providing a stable framework for building scalable, highly available, and secure applications. In fact, in the long list of WebLogic's strengths and features, only one shortcoming stands out: the documentation that comes with the WebLogic server often leaves users clamoring for more information. WebLogic: The Definitive Guide presents a 360-degree view of the world of WebLogic. Providing in-depth coverage of the WebLogic server, the book takes the concept of "definitive" to a whole new level. Exhaustive treatment of the WebLogic server and management console answers any question that developers or administrators might think to ask. Developers will find a useful guide through the world of WebLogic to help them apply their J2EE expertise to build and manage applications. Administrators will discover all they need to manage a WebLogic-based setup. And system architects will appreciate the detailed analysis of the different system architectures supported by WebLogic, the overall organization of a WebLogic domain and supporting network infrastructure, and more. WebLogic: The Definitive Guide is divided into three sections that explore WebLogic and J2EE. Managing the WebLogic Environment, and WebLogic Enterprise APIs. Some of the topics covered in this comprehensive volume include: Building web applications on the WebLogic Server Building and optimizing RMI applications Using EJBs with WebLogic, including CMP entity beans Packaging and deploying applications Understanding WebLogic's support for clustering Performance tuning and related configuration settings Configuring WebLogic's SSL support Maximizing WebLogic's security features Building web services with XML Using WebLogic's JMX services and MBeans Anyone who has struggled with mastering the WebLogic server will appreciate the thorough, clearly written explanations and examples in this book. WebLogic: The Definitive Guide is the definitive documentation for this popular J2EE application server.

This is the first book on practical approach to Services Oriented Architecture (SOA) using BEA AquaLogic Service Bus tool and is the first definitive book on AquaLogic by BEA Systems ' AquaLogic product lead. The author cuts through the theory and demonstrates how to successfully use the product in practice. The book is targeted at professional software developers and architects that know enterprise development, but are new to enterprise service buses (ESB) and service oriented architecture (SOA) development. It provides a hands-on guide to developing SOA-driven applications with ESB as central components.

"BEA WebLogic Workshop 8.1 Kick Start" shows you how to make J2EE programming easier, providing the fastest path to productivity with BEA WebLogic Workshop 8.1. The authors show how Workshop leverages the power of BEA WebLogic Platform 8.1, including WebLogic Server, WebLogic Portal, and WebLogic Integration. With "BEA WebLogic Workshop 8.1 Kick Start," you'll learn to build J2EE applications and see how each concept works within a real-world online casino application developed over the course of the book. You'll see how Workshop 8.1 facilitates every step of the development process, from design to deployment. The authors' expert insights and tips, along with dozens of practical examples that you can put to use immediately, will have you up and running at full speed in nothing flat. The included CD-ROM contains the Developer's Edition of BEA WebLogic Platform 8.1 (including WebLogic Workshop 8.1) and all the sample code and examples, with a complete version of the casino application developed over the course of the book. In addition you can view the entire book in searchable electronic form.

With the release of WebLogic Server 7.0 in June 2002, BEA positioned WebLogic Server as the premier J2EE Web Services development platform. With the next release in late 2002, WLS will integrate WebLogic Workshop and other key tools to provide developers with a stable, market-leading product designed for the next generation of Java applications based on Web Services on the latest J2EE platform. BEA WebLogic Server is the leading J2EE application server, holding almost 40% of the market share in this competitive category. WebLogic Server Unleashed is designed to be the definitive reference work for the WLS developer, offering an in-depth look at the capabilities provided by WLS 7.X and illustrating the best development practices.
