NEW YORK TIMES BESTSELLER • The author of *Get Out of Your Head* offers practical solutions for creating true community, the kind that's crucial to our mental and spiritual health. "My dear friend Jennie Allen shows us how to make true emotional connections with the right people so that our authentic relationships can be healthy for all."—Lysa TerKeurst, author of *It's Not Supposed to Be This Way* In a world that's both more connected and more isolating than ever

before, we're often tempted to do life alone, whether because we're so busy or because relationships feel risky and hard. But science confirms that consistent, meaningful connection with others has a powerful impact on our well-being. We are meant to live known and loved. But so many are hiding behind emotional walls that we're experiencing an epidemic of loneliness. In *Find Your People*, bestselling author Jennie Allen draws on fascinating insights from science and history, timeless biblical truth, and vulnerable stories from her own life to help you:

- overcome the barriers to making new friends and learn to initiate with easy-to-follow steps
- find simple ways to press through awkward to get to authentic in conversations
- understand how conflict can strengthen relationships rather than destroy them
- identify the type of friend you are and the types of friends you need
- learn the five practical ingredients you need to have the type of friends you've always longed for

You were created to play, engage, adventure, and explore—with others. In *Find Your People*, you'll discover exactly how to dive into the deep end and experience the full wonder of community. Because while the ache of loneliness is real, it doesn't have to be your reality.

In an unorthodox approach, Georgetown University professor Cal Newport debunks the long-held belief that "follow your passion"

is good advice, and sets out on a quest to discover the reality of how people end up loving their careers. Not only are pre-existing passions rare and have little to do with how most people end up loving their work, but a focus on passion over skill can be dangerous, leading to anxiety and chronic job hopping. Spending time with organic farmers, venture capitalists, screenwriters, freelance computer programmers, and others who admitted to deriving great satisfaction from their work, Newport uncovers the strategies they used and the pitfalls they avoided in developing their compelling careers. Cal reveals that matching your job to a pre-existing passion does not matter. Passion comes after you put in the hard work to become excellent at something valuable, not before. In other words, what you do for a living is much less important than how you do it. With a title taken from the comedian Steve Martin, who once said his advice for aspiring entertainers was to "be so good they can't ignore you," Cal Newport's clearly written manifesto is mandatory reading for anyone fretting about what to do with their life, or frustrated by their current job situation and eager to find a fresh new way to take control of their livelihood. He provides an evidence-based blueprint for creating work you love, and will change the way you think about careers, happiness, and the crafting of a remarkable life.
