Mental Maths is the maths we do in our heads without the use of calculators and without writing down the calculation. Mental Maths strategies are the 'tricks' we use to do Maths in our heads. There are different ways of finding the answer to any Mental Maths problem, and such strategies are the focus of this series. Even though calculators and computers play an enormous role in the modern world, we still need to go back to the basics % we do need to know how to check that the sales assistant at the counter is giving us the right change! Mental Maths has become more important than ever and new primary Maths syllabuses in Australia are reflecting this. For example, NSW has placed an emphasis on Mental Maths in its primary syllabus, and even the Year 10 School Certificate examination has a compulsory non-calculator section. Features of this book include: 32 double-page units of Mentals are included % 8 units for each school term each unit is divided into four sets (A,B,C and D) of 20 questions each each numbered question covers particular Maths topics throughout the book: for example, Question 1 always covers addition, while Question 20 always covers geometry a special 'eHelp' section., at the front of the book gives different strategies and explanations to help students solve Mentals problems. These are also numbered so they link to the question numbers in each Mental unit a eFun Spot., unit, containing fun activities, and a eRevision., unit are included at the end of each 8 units extra practice., sections which reinforce particular strategies appear in the lower part of each page. Answers to all questions are in a lift-out section in the centre of the book

New Wave Mental Maths is a series of six pupil workbooks, written to provide a comprehensive and structured daily mental maths programme.

This series is designed to help teachers prepare for the National Tests at the end of each year and leading up to the final test at the end of KS2. Mental Maths for ages 5-6 contains eight photocopiable mental maths tests, reflecting the look and feel of the real tests. Accompanying the books is an audio CD which contains all the eight tests timed to the exact specifications of the actual test with set times for pupils to answer the questions. All that the teacher needs to do is turn on the CD player! Answers to all the tests are provided too.

The format of Mental Arithmetic differs from that of traditional mental arithmetic materials in that pupils read the questions themselves, use rough paper for workings out, and write down their answers. It provides intensive practice in all areas of the maths curriculum.

"New wave mental maths is a series of student workbooks, written to provide a comprehensive and structured daily mental maths program for students in Australian primary schools."--Foreword.

The format of Mental Arithmetic differs from that of traditional mental arithmetic materials in that pupils read the questions themselves, use rough paper for workings out, and write down their answers. It provides intensive practice in all areas of the maths curriculum.

Presents math strategies, activities, and step-by-step examples to help students understand and compute math problems without the aid of written or calculator computations.

These simple math secrets and tricks will forever change how you look at the world of numbers. Secrets of Mental Math will have you thinking like a math genius in no time. Get ready to amaze your friends—and yourself—with incredible calculations you never thought you could master, as renowned "mathemagician" Arthur Benjamin shares his techniques for lightning-quick calculations and amazing number tricks. This book will teach you to do math in your head faster than you ever thought possible, dramatically improve your memory for numbers, and—maybe for the first time—make mathematics fun. Yes, even you can learn to do seemingly complex equations in your head; all you need to learn are a few tricks. You'll be able to quickly multiply and divide triple digits, compute with fractions, and determine squares, cubes, and roots without blinking an eye. No matter what your age or current math ability, Secrets of Mental Math will allow you to perform fantastic feats of the mind effortlessly. This is the math they never taught you in school.

Hone your child's or class' mental maths with this range of tests designed by a practising Primary Maths Coordinator. The 30 tests contained within this book are grouped into 10 blocks, each containing 3 similar tests. This allows for improved consolidation and improvement when compared with other test books that quickly jump from one mathematical concept to the next. Suitable for use in the classroom or at home. Answers included. This is the UK version of the book which uses English spellings and £s and pence in the questions.
