The completion of the White Pass and Yukon Route railway from Skagway, Alaska, to Whitehorse in 1900, and the establishment of Whitehorse, located at the head of navigation on the Yukon River, as the base of operations for a large fleet of sternwheelers guaranteed that the community would be permanent, and the construction of large-scale power production facilities was soon being planned.

Paddling the Yukon River and its Tributaries covers more than 4,000 miles of watery trail. The Yukon, Tanana, Porcupine, Koyukuk, and Kuskokwim Rivers are the five longest rivers in Alaska, extending into the Yukon Territory. This water flows freely, almost entirely undammed. Salmon surge against current. Moose, bears, and wolves wander the banks. Birds swarm in spectacular density. Roads rarely cross. Many residents live a subsistence lifestyle. No permits are required to be here. These channels are a natural path through the last large wilderness in North America. Paddling the Yukon River and its Tributaries approaches journeys of this magnitude like a through-hiker on the Appalachian Trail, but with a canoe or kayak. Each river is described from beginning to end, detailing access points, resupply options, and navigation tips throughout the flow. There are 35 original maps. Although the approach assumes long voyages, information is supplied for a range of trip lengths. Anything from an afternoon to a weekend to a week to a two-month float is possible. Paddling the Yukon River and its Tributaries is the only guide book to paddling the entire Yukon River from beginning to end.

A thrilling journey by canoe across Alaska, by critically acclaimed writer Adam Weymouth. The Yukon river is 2,000 miles long, the longest stretch of free-flowing river in the United States. In this riveting examination of one of the last wild places on earth, Adam Weymouth canoes along the river's length, from Canada's Yukon Territory, through Alaska, to the Bering Sea. The result is a book that shows how even the most remote wilderness is affected by the same forces reshaping the rest of the planet. Every summer, hundreds of thousands

of king salmon migrate the distance of the Yukon to their spawning grounds, where they breed and die, in what is the longest salmon run in the world. For the communities that live along the river, salmon was once the lifeblood of the economy and local culture. But climate change and a globalized economy have fundamentally altered the balance between man and nature; the health and numbers of king salmon are in question, as is the fate of the communities that depend on them. Traveling along the Yukon as the salmon migrate, a four-month journey through untrammelled landscape, Adam Weymouth traces the fundamental interconnectedness of people and fish through searing and unforgettable portraits of the individuals he encounters. He offers a powerful, nuanced glimpse into indigenous cultures, and into our ever-complicated relationship with the natural world. Weaving in the rich history of salmon across time as well as the science behind their mysterious life cycle, *Kings of the Yukon* is extraordinary adventure and nature writing at its most urgent and poetic. "Kings of the Yukon succeeds as an adventure tale, a natural history and a work of art."—Wall Street Journal

Describes the river from Whitehorse, the capital of Yukon Territory, to Dawson, near the Arctic Circle, and looks at the gold rush of 1898

Approximately 1 inch = 1/2 mile.

This solo wilderness, kayaking journey began many years ago, years before I even knew anything about kayaks and paddling down remote, legendary rivers. Poring over maps of those places revealed very little. The blank spaces spread far and wide. At last, after decades of dreaming, I stood on the shore of Lake Atlin in British Columbia, where the headwaters of the Yukon River are. I stood there and thought about all those hope-filled years and was thrilled at the anticipation of leaving that morning in mid-June. Crossing the expanse of Lake Atlin in a fine mist, I guided the kayak toward Graham Channel, which would take me to Tagish Lake. There I met Jim and Marion Brook at their cabin. After hot coffee and freshly baked cookies, they sent me on my way. They were the first of many people who helped me on my journey. That evening, having found the "perfect" campsite, I inspected the area for bear tracks. Finding none, I started a large campfire before setting up the tent. Supper had been eaten at a previous stop, so there was no cooking where I stayed for the night. This was the procedure I followed every night. It kept animals bigger and hungrier than me from visiting my campsites. As I paddled down the lakes, I stopped at villages such as Tagish, I paddled down Marsh Lake and down dangerous Lake Laberge, and I stopped in historic towns such as Whitehorse and Dawson City. I passed by wrecked and beached steamboats from the gold rush days and finally crossed the US/Canadian line into Alaska. I had paddled through a forest fire so immense that it took a day to pass the flames. The current carried me past Eagle, Circle City, though the Yukon flats (where the river was ten to twenty miles wide); and I crossed the Arctic Circle at Fort Yukon. Then came

the small villages of Beaver, Stevens Village, and then the oil pipeline. I paddled on to Rampart, where the fierce head wind nearly drove me back upstream. Next, I passed through Tanana, where I met Emmet Peter, who won the Iditarod long ago, then on to Ruby, Galena, Nulato, and Holy Cross, where Bergie Demientieff served me coffee and gave good advice. Finally, I arrived at Russian Mission, where I ran out of time after fifty-one days and two thousand miles of paddling my kayak. There Harvey Pitka and his wife, Ester, fed me a wonderful dinner before I flew out. As the plane climbed and banked toward Bethel, I knew that I would return one day to finish my kayak trip to the Bering Sea.
